Rock, Paper, Scissors!

Subtraction to 20

CCSS 1.OA.6, 2.OA.2

Mrs. Lirette's Learning Detectives

Rock, Paper, Scissors:
Subtraction Partner Game

I can subtract within 20.

Common Core Alignment: 1.OA.6
Add and subtract within 20.
Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., 8 + 6 = 8 + 2 + 4 = 10 + 4 = 14); decomposing a number leading to a ten (e.g., 13 – 4 = 13 – 3 – 1 = 10 – 1 = 9); using the relationship between addition and subtraction (e.g., knowing that 8 + 4 = 12, one knows 12 – 8 = 4); and creating equivalent but easier or known sums (e.g., adding 6 + 7 by creating the known equivalent 6 + 6 + 1 = 12 + 1 = 13).

Common Core Alignment: 2.OA.2
Add and subtract within 20.
2. Fluently add and subtract within 20 using mental strategies.2 By end of Grade 2, know from memory all sums of two one-digit numbers.

Created by M. Lirette, 2011

Directions:

Deal out all cards into two piles face down (one pile for each player). Both players draw a card from their pile. Each player must read the number sentence aloud and solve it correctly. Once answers have been given, players lay their cards down to see who has won the round. Rock beats scissors, scissors beats paper, and paper beats rock. If a WILD card is drawn, the player may choose rock, paper, or scissors for that round. If it is a tie, both cards are returned to the middle of each player's stack. The winner of the round sets both cards into a separate pile of his/her winnings. Play continues until all cards are gone. The player with the greater number of cards in his/her winnings pile at the end of the game is the overall winner.
