Directions for Bingo: Use a Vis-à-vis marker to write a numeral in each of the boxes from 1-20. Display the premade flashcard to the other player. If the sum is on the math card, then place a marker on the card. There are several ways to win the game.

- To win the game, students can have a marker in each corner which is called 4 corners.
- To win the game, students can have 4 markers diagonally.
- To win the students can have 4 markers at the top or at the bottom of the card.
- To win the students can fill up the whole card.

Dice Game:

- Player 1 will roll 2 dice and write down the numbers (addends). Addends are the two numbers you are adding.
- Add up the addends and write the sum. The sum is the answer. If both players agree with the answer, then player 1 will toss a coin. If player lands on heads, then player will move 2 spaces. If player lands on tails, then player will move 1 space.
- Player 2 will roll 2 dice and write down the numbers (addends).
- Player 2 will add up the addends and write the sum. The sum is the answer. If both players agree with the answer, then player 2 will toss a coin. If player lands on heads, then player will move 2 spaces. If player lands on tails, then player will move 1 space.

M	A	T	H

Please put the numbers 1-20 in the boxes in random order.
