Pirate Attack: Activity #1

1. Give each player a ship.
2. Place treasure and pirate cards face up on the table.
3. Cover each treasure and pirate card with one sight word card. Sight word card should be facing down.
4. Players take turns turning over one sight word at a time. The player must correctly read the sight word card. If the player uncovers a treasure card then they keep it and place it on their ship. If the player uncovers a pirate they leave the pirate card on the table. No one wants pirates aboard their ship!
5. If a sight word card is read incorrectly, then the sight word card must be turned back over and remain on the table. This player's turn is over, but they may try to read the sight word card again on their next turn.
6. The player with the most treasure cards on their ship at the end of the game wins!

Pirate Attack

Target: Use this game to make flashcards more fun! Use in combination with 'Reading Fluency Flashcards' from ReadingResource.net.

Materials: Print pirate ships for each student. Print one copy of the pirate sheet and two of the treasure sheet. Cut apart. Laminate all materials for durability.

Directions: Place treasure and pirates face up on the table while the students are facing the other direction. Cover each piece with one flashcard. Students take turns picking one flashcard to read and discovering if they uncovered a treasure or a pirate! If they uncover a treasure they keep it on their pirate ship. If they uncover a pirate they leave it on the table. The student with the most treasure at the end of the game wins!
