Program Summary:

Se habla español! A Better Chance Tutoring, LLC ("Brindando una Mejor Oportunidad") provides one-on-one, in-home tutoring for your convenience and your child's academic advancement. We coordinate with your schedule and arrange to tutor your child when it's convenient for you! Tutoring services are 1-2 hours and 1-2 times per week, after school or on the weekends. Utilizing the Leveled Reader approach, we tailor our program specifically to your child's individual needs, yielding great academic outcomes. For the 2006-2008 school years, the average percentage of improvement for reading fluency in grades 1-5 was 60%. Our curriculums are built on and support the recommendations of the five principles of reading (phonemic awareness, phonics, fluency, vocabulary, and reading comprehension) as identified by the National Reading Panel and recognized by No Child Left Behind. Don't leave your child behind, sign up with us today!

Brindando una Mejor Oportunidad le proporciona con un tutor particular en el hogar para su conveniencia y para el avance academico de sus hijos. Coordinamos con su horario y organizamos las visitas cuando sea conveniente para usted! Los servicios de tutor son de 1-2 horas y de 1-2 veces por semana, despues de la escuela o en los fines de semana. Utilizando el acercamiento del lector nivelado, adaptamos nuestro programa especificamente a las necesidades individuales de sus hijos, rindiendo grandes resultados academicos. En los anos escolares 2006-2008, el porcentaje promedio del indice de superacion de fluidez do lectura en los grado 1o-5o fue 60%. Nuestros planes de estudios fueron creados y son respaldados por las sugerencias en los cinco principios de lectura (conocimiento del fonema, lectura fonetica, fluidez, vocabulario, y comprension de lectura), segun indentificados por la comision nacional de la lectura y reconcidos por "Ningun Nino Dejado Detras". No deja a su nino atras! Inscríbese hoy con nosotros!

Program Summary:

Learning Solutions, has been serving students in the Atlanta area for 19 years. The longevity, the return of students, and the improvement of academics demonstrate the effectiveness of the tutorial program. The UGA/DOE 2007-2008 survey analyzed the test scores of students served by Learning Solutions and showed that in math, more than fifty percent of the Learning Solutions SES students scored higher on the State CRCT than the comparison group. The Survey showed that in reading, a greater percentage of Learning Solutions SES students moved to a higher performance level on the State CRCT than the comparison group. Tutorial sessions are 1.5 hours (bi-weekly) with choices of days and times (Monday-Thursday, 4:00 p.m. to 8:00 p.m. / Saturday 10:00 a.m. to 12:00 p.m.). Flexibility is necessary. Parents who are the sole source of transportation often have schedules that create hardships. These schedules must be addressed. The instruction at Learning Solutions is based on the results of a reading/L.A. and math Basic Skills Inventory given to each student and the review of each student's CRCT. Using this information, the student is prescribed an individualized curriculum with goals set to improve weak areas as shown on the BSI and CRCT. The curriculum is designed to improve grades, CRCT scores, and aligns with GPS. An integrated approach is used in reading, to address word analysis, vocabulary, comprehension and study skills. The math curriculum utilizes a balanced mathematics approach where basic knowledge, operational skills, and the ability to make application are equally fostered. The curriculum is computer based and monitored by teachers with advanced degrees who are continually helping the students (5:1 ratio). Learning Solutions is located in a quiet, accessible plaza. There are 18 computer stations and 5 work stations. All instructional materials are provided. Learning Solutions has been a Georgia SES provider for seven years.

Program Summary:

We believe if a child attends our program regularly, we can help them. We have over 35 years of tutoring experience and our program is designed with the highest regard for helping struggling learners. We tutor students in Kindergarten through 8th grade in reading and math. Our professionally trained tutors, most of whom are certified teachers from the local school and community, are trained to ensure that our students are always supervised. Our program is housed mainly in the local schools with local teachers, paraprofessionals and qualified staff hired to do the tutoring. Our classes are held two days a week for 60 to 90 minutes each day, and we tutor in small and large groups. A key component of our program is the goal setting conference which allows all parties; our staff, parents and the school personnel to participate following an examination of standardized test scores, other school information, or diagnostic pre-test, if needed. With this information we develop a Student Learning Plan with specific goals and individualized curriculum for the student. To ensure scope and sequence of skills taught through tutoring, our curriculum is aligned with the Georgia Performance Standards (GPS), the child's classroom curriculum, and the master plan of each School District we serve, while employing a variety of research-based strategies. Our program emphasizes 5 Reading strands and 5 Math strands. Frequent assessment and reporting progress are key components of effective teaching and we present a progress report monthly to parents, teacher and school districts. Our company administers a post test (Achieve) to determine student growth and curriculum strengths and weaknesses. We take pride and count it a privilege to provide supplemental services in Reading and Math to the students in the State of Georgia.

Program Summary:

A to Z In-Home Tutoring provides in person, one-on-one instruction in the comfort and convenience of a student's home or in small groups of 3-6 students at school or alternate location. Our tutors work with children in Reading, Language Arts and Math. As one of the largest national providers of No Child Left Behind tutoring for the past seven years, we are very experienced, yet have a personalized local approach, as we have operated in Georgia since 2004. In 2006-2007, students enrolled with A to Z experienced an average gain of 4 newly acquired math and language arts skills. All of our curriculum content is research-based and focuses on helping struggling students succeed. Students are pre-tested to identify which skill sets they are deficient in so tutoring services are 100% custom tailored and individualized for the needs of the client. Periodic mini-assessments are used to monitor the student's growth. During the final session a post-test is given to measure the overall gains of the child and the new academic skills they have achieved. Through traditional one-on-one and small group tutoring, students are able to reach and exceed their educational goals much more quickly and effectively. Strong teaching backgrounds and a comprehensive understanding of children's needs enables these qualified tutors to develop learning skills, polish self-esteem, boost confidence and enhance motivation. The student's family and tutor determine the tutoring schedule. Days and times of tutoring are coordinated between the parents, tutor, and/or school personnel with sessions ranging from 1-2 times per week and lasting between 1-2 hours each session.

Program Summary:

A+ Academics (A+) is an SES provider in Oklahoma and Texas. We have successfully tutored 4,000+ students over the last 7 years. In 2007-2008, A+ serviced 900 SES students, most being underachieving and low income students. We are expanding our services and are now licensed to begin operating in Georgia.

We provide individual and small group tutoring in reading, language and math, including algebra and calculus. We offer tutoring in public facilities including libraries, churches and schools. In-home tutoring is also available. Our program uses research-based strategies in neurolinguistics programming, memorization techniques and brain-based learning. We agree with L.A. Hurt's learning theory that the educational environment should consist of four features: 1) high expectations; 2) non-threatening ambiance; 3) a 100% mastery goal; and 4) an air of reality (exposure to the same concept in more than one setting). Our program is closely aligned with the Georgia Standards and Criterion-Referenced Competency Tests and is designed to increase K-12 student academic scores.

A+ tutors are certified teachers, professionals, and college students with 2+ years experience. We work with students, parents and teachers to develop an instructional program with the following elements designed to help each student meet or exceed state standards:

1) Pre-Tutoring Assessment; 2) An Individualized Student Learning Plan (a road map); 3) Measurable Goals; 4) Progress Reports; and 5) Post-Tutoring Assessment / Final Report.

Tutoring Sessions are 60-90 minutes, twice weekly. Students are tested every 10-12 hours to measure skill development. Historically, our students academic growth ranges and average of 2.5 grade levels. We emphasize continual communication with students, parents, teachers, and school officials. We are committed to not only helping students improve academically, but to improve their attitude towards life-long learning.

Program Summary:

A+ Show Kids Learning Academy (APSKLA) employs highly-trained instructional leaders who work to ensure that the goals of the No Child Left Behind Act are met. The APSKLA staff is comprised of skilled professionals possessing over seventeen years of educational experience and who have had remarkable success in closing achievement gaps with children of all learning styles. By using the latest educational technology paired with research-proven strategies each student is ensured a custom tailored learning experience. Student's progress is monitored on an ongoing basis through various assessments such as The Diagnostic Reading Assessment (DRA), and Running Records. Our tutors work with children in Reading, Language Arts, and Math. The academy was founded on the belief that education shared with care and nurturing provides an awakening of the mind, rendering it able to more readily absorb and apply what is learned. Through a proper educational process, students are not developed as robots but instead, as critically-thinking individuals who are able to apply their learning in a way that uniquely expresses and defines who they are. We believe that success can be obtained, regardless of ethnicity and social status. APSKLA is committed to staffing employees with the ability to inspire these students to strive for their personal best. We provide tutoring before and after school, Saturdays and during the summer. Each session is 1.5 hours in length. We believe at APSKLA that learning should be fun, interactive and exciting. Tutoring schedules are arranged collaboratively with parents. We offer flexible scheduling options to ensure that all students are given the opportunity to obtain quality tutoring services. The founders of APSKLA believe that while every child may not learn at the same pace, if the right tools are provided to arouse inner motivations, much can be accomplished in the learning process.

Program Summary:

Educate! Motivate! Celebrate! We believe if the child is in our seat we can help them. Our program is designed with the highest regard for helping struggling learners in Georgia. We tutor students in Kindergarten through 8th grade in reading or math. Our professionally trained tutors, most of whom are certified teachers from local school and community are trained to ensure that our students are always supervised. We are in our fifth year of operation. Our program is housed mainly in the local schools. Our classes are held two days a week for 90 minutes each day and we tutor in small groups and large groups. A key component of our program is goal setting with all parties; parents and school personnel participate following an examination of available school data and an analysis of a diagnostic pretest. With this information, we develop an Individual Student Plan (ISP) with specific goals and individualized curriculum for the student. We have aligned our curriculum and the master plan of each School District we serve. We present a progress report monthly to parents, teachers and school districts. Our company administers a post test to determine student growth and curriculum strengths and weaknesses. We are happy to report, there are significant reading and math gains in every school district we serve. Our company conducts initial and on-going training for tutors. We celebrate learning at the end of the program by inviting parents, tutors, and students to a Completion Ceremony. At this ceremony we recognize each child's work ethic and regular attendance. Our tutoring company takes pride and counts it a privilege to provide supplemental services in Reading and Math to the students in the State of Georgia.

Min. Number of Students (each district): 12
Cost to District (per hour): \$50

Program Summary:

A+ Tutoring is a new division of Challenging Failure expanding to provide the same quality instructional program to high school students. Our program uses technology to identify where the student needs help and provides instruction in small groups with teachers who are trained to find the best way to teach your child. And we keep teaching until the student has learned what they need to know! Together we set goals based on the standards and a timeline is established. According to the State SES Satisfaction Survey 2008, 100% of our students believe our tutoring improved their grades and 75% of parents would use our services again. We meet in public libraries, Boys & Girls Clubs, and church halls for 1 to 2 hours per session, one to two times per week according to your schedule. Our groups are no larger than 4 students per tutor so your child gets a lot of individual attention. All materials are provided.

Max. Number of Students (all districts):	500
Min. Number of Students (each district):	24
Cost to District (per hour):	\$35.00

Program Summary:

A.Z. Kelsey Academy will provide supplemental services in the areas of reading and math to middle school students. Housed in a former middle school facility, A.Z. Kelsey Academy will serve as the primary site with other school sites identified throughout the system. Both external and internal providers have offered supplemental services in the Griffin-Spalding County School System for over five years. The effectiveness of the supplemental services delivery model is evident through the academic achievement of middle school students enrolled at Kennedy Road Middle School (KRMS). After seven years of being in needs improvement, at the end of the 2005-2006 school year, KRMS, formerly A.Z. Kelsey Middle School, was the only middle school in the system that made AYP. Students at the school, especially subgroups, demonstrated remarkable improvement in key content areas. The school has maintained AYP status for the past two years and consequently, has come off the state's Needs Improvement listing. This proposal calls for supplemental services to be delivered in two ways: tutorial sessions on Tuesday and Thursday afternoons for 90 minutes a day (from 3:30 - 5:00) and Saturday morning tutorials for 3.5 hours lasting from 8:30 - 12:00 with a 30 minute break. An additional hour will be added to each day for teachers to allow time for data analysis and planning. The models of instruction included in this proposal are READ 180 for reading support and ALEKS for math support. Both programs are supported by empirical research, closely align with state and national standards, and include comprehensive on-going assessment components. A.Z. Kelsey Academy and all other sites utilized in delivery of supplemental services have fully equipped computer labs for use during individualized instructional support. A.Z. Kelsey Academy has no prior years of service as a Georgia SES provider.

Grade(s) Served: K-8

Student\Tutor Ratio: 8:1

Max. Number of Students (all districts): 1500

Min. Number of Students (each district): 6

Cost to District (per hour): \$70

Program Summary:

ABOUTFACE! Reading has been teaching reading to students throughout the Southeast for 11 years and has been an SES Provider in Georgia for four years. Our reading lessons are designed using the five scientifically-based strategies recommended by the National Reading Panel to increase reading skills. Every student is pre-tested to determine their unique needs and an Individualized Learning Plan is developed with teacher and parent input. Then, leveled books are chosen that reflect each student's current reading abilities. As students' mastery increases, additional tests pinpoint remaining skill gaps. Learning Plans are then updated to fill those gaps. Finally, post-tests are administered to gauge student improvement. Each child receives approximately 20 hours of tutoring, usually 1 hour sessions, twice weekly. All of our pupils will move to the next reading level or higher. Every child keeps every book they read. Lessons are held in LEA's, churches, libraries or other public area. We provide all materials including scripted lesson plans, books, word cards, and any other materials needed for the course of instruction.

Student\Tutor Ratio: 8:1

Max. Number of Students (all districts): 1000

Min. Number of Students (each district): 10

Cost to District (per hour): \$60

Program Summary:

Custom One-on-One, or small group tutoring, (less than 8:1), in the student's home or pre-arranged facility. Progress occurs because of the Individualized nature of the program, while supplementing classroom work. Qualified tutors are "matched" to the student in Reading, Language Arts and/or Math.

Parent insight, teacher feedback, school assessment scores, and Initial Pre-testing form a program blueprint, and tutoring progresses as subject mastery is achieved. Each student receives a custom Individual Student Plan & Academic Plan of Achievement and Goals, with teacher's feedback requested to assist in preparing a program for each student. Daily Lessons are prepared for each student using Georgia Performance Standards (GPS), and regular Progress Reports are provided every 2 weeks. Using a final post-test session, test data is compared to the initial Pre-test to determine improvement for each student.

Tutoring sessions are traditionally twice per week, between 1.5-2 hours, followed by a Parent Consultation. On average, improvement is one letter grade after 3 months. Student achievement improvement has averaged over 25% in Reading; Language Arts; & Math for 4 consecutive years. 6 years proven results working with at-risk and low-income families under the "No Child Left Behind Act".

Program Summary:

"Achieve HighPoints" - (Online Tutoring Program) "Achieve HighPoints" program offers students' self-paced Online math Tutoring service aligned to GA state GPS curriculum for grades 3-12. It helps students Retain & Reinforce classroom learning, builds stronger Math skills, achieve higher scores on CRCT, EOCT, and GHSGT tests. In the last three (3) years as a GA state approved SES provider, Achieve HighPoints has successfully helped students improve their math grades from 'F' & 'D' to 'A' and 'B' and helped schools make AYP. No transportation is required! Students attend online tutoring sessions 24/7 from the safety and comfort of their home. Students with Internet at home are provided with a laptop computer for instructional purposes only. Students may attend unlimited Online Tutoring sessions until the end of the school year. Students attending at least 40 hours of tutoring are expected to achieve significant growth in their test scores and earn 'A' and 'B' math grades. Key features include: *Students are tutored using software based interactive Learning, Practice & Review sessions on targeted lessons & assignments to fill achievement gaps. *Develop problem solving skills with the help of Step-by-Step solutions to each math problem. *Differentiated instruction aligned to GPS curriculum and dynamic intervention for effectiveness. *Grade level Assessment and individual Student's Learning Plan (SLP) with a flexible learning schedule. *Parents may review students' online tutoring sessions and track progress *High achieving students are offered rewards/incentives per state guidelines. *Students may attend self-paced unlimited Online tutoring sessions all through the school year at NO charge to parents or the school district.

Min. Number of Students (each district): 40 (open for negotiation with LEA)

Cost to District (per hour): \$55-\$65

Program Summary:

The AchieveResults™ Tutorial program was developed by a former mathematics university professor and middle school math educator, and has a proven record for improving students' academic achievement on the CRCT! AchieveResults™ Tutorial president has been in education for 19+ years, and AchieveResults™ Tutorial has successfully tutored students in mathematics and reading in grades K – 8 for the past six years, across Georgia. Because of our small group instruction, our tutors are able to identify and work on students' individual weaknesses, based on pre-test results.

All instructional materials are provided, and are aligned with the Georgia Performance Standards that students must master for success on the CRCT. Our research-based mathematics and reading curriculum has been effective in improving students' mathematics and reading performance both on the CRCT and in school. The AchieveResults™ Tutorial program meets 1 ½ to 2 hours after school, twice weekly at students' school (with principal's permission), or on Saturdays at selected locations. Staff includes certified, special education, English Language Learner teachers, and retired school administrators. This program is FREE for eligible students and FREE TRANSPORTATION is provided at selected sites. If you are looking for results, count on AchieveResults™ Tutorial. Contact your child's school or call AchieveResults™ Tutorial for more information.

Program Summary:

Alpha Academy Tutorial Center (AATC) has successfully increased the academic achievement in reading, writing, and mathematics for seven years. Our program is designed to meet the educational needs of each participating student by providing the foundation required to succeed in the areas of reading, writing, and math. Lesson/activities are accompanied by appropriated and easily communicated instructional objectives and are aligned with the Georgia Performance Standards at the appropriate level of complexity. We establish good trusting relationships with our students that lead to their success.

Program Summary:

Alpha Test Prep's use of Differential Instruction allows us to meet the diverse educational needs of the students we serve. We use Direct Instruction, Previewing, Acceleration, Graphic Organizers, and Hands on Instruction as a few of the instructional methods to reach our students.

We incorporate the use of CRCT sub-score results, provider administered pre-test, classroom teacher conferencing, and parent/guardian input to develop student assessment profiles. From these profiles we develop Individual Student Instructional Plans for each student. ATP's effectiveness was demonstrated in the 2007-2008 school year when 100% of our students passed the CRCT.

ATP's sessions last from 45 minutes to one hour and fifteen minutes. The sessions are structured to maximize the funding each student is allotted for tutoring.

We are not technology based. We do however, use computers for remediation, assessing GPS aligned internet material, and test prep. All instructional material employed by ATP is GPS aligned and NCLB compliant.

Program Summary:

Alternatives Unlimited (AU) has been an approved vendor in several states over the past five years. According to collected qualitative data, students demonstrated a more serious approach to engaging in classroom activities and showed confidence in taking standardized tests. Parents expressed satisfaction with their children's progress and the overall delivery of instruction. Our focus has been to assist students to improve academic achievement on state standards. Our model of instruction includes small group instruction that is focused on pre-testing of all students. The optimal AU time on task for our tutoring session will last two hours per day and takes place two days per week. AU does understand, however, that a two hour session may prove to be grueling for the younger learners; therefore, AU is prepared to modify delivery with shorter sessions that meet more often during the week. Our class size is typically 1:5 or specifically 1:1 for special populations. Usually all tutoring takes place at the school site if space permits. Provided instructional materials include paper, pencil, rulers, technology and others when applicable.

Goals are written based on pre-test, parent, school and LEA documentation of student data. According to collected qualitative and quantitative data, targeted students demonstrated academic growth on standardized tests. Parents receive weekly updates in either English or Spanish based on pretest assessments so that they understand the gains their child is making focused on the shared goals written at the start of the tutoring. All lessons taught to students include graphic organizers that are provided by the tutor. All supplies for students are also provided by the vendor so that students have a successful tutoring experience. AU is a new SES provider in Georgia.

Cost to District (per hour):	\$50

Program Summary:

August House uses highly engaging stories from around the world with colorful animations, entertaining read along files, carefully illustrated picture books and targeted practice assignments to build the specific reading skills each student needs to succeed on the CRCT. The self-paced program is aligned to the Georgia Performance Standards (GPS) for grades K-5. It can be used individually or in a small group. The program and assignments are highly interactive and guide the students to practice exactly the skills that they need to master. Students will need to have internet access and are expected to use the program twice a week for one hour at home, at a library, a community center or other facility with an internet connection. Each student is assessed throughout the program and the results are used to build an Individual Student Profile (ISP) that identifies specific strengths and weaknesses matching the GPS. Progress is measured, tracked and reported to ensure that the student is practicing the specific reading skills that he or she needs to build. When students complete a story unit, they take the book home to build their own personal reading library. After completing the program, on average the students will improve their reading skills by 10% or more on standardized tests. No transportation required. This highly engaging instructional model was developed over four years of research and testing. As a result, the program targets emerging and struggling readers who need to develop stronger skills and confidence in phonics, vocabulary, comprehension and fluency as defined by the Georgia Performance Standards.

Cost to District (per hour):	\$40

Program Summary:

Ava White Tutorials, Inc. has been helping students for 28 years. We have been involved with 3 school systems and 6 schools in the No Child Left Behind program since 2003. To date, we have assisted 5 of these 6 schools to make the Adequate Yearly Progress List. We have seen students in our after-school programs make significant gains in Reading, Math, and Language Arts. Many of our students advance 1-2 grade equivalents after the 30 hours of tutorials. To identify academic goals, each student is given a pre-test. Then we write an Individual Learning Plan, using the results of the testing, parent and teacher input. Students typically meet after school, at their school, with highly qualified, certified teachers who have valuable years of classroom experience. We see students in small groups, usually 3 to 6 pupils in these after school classes, and they meet 2 times a week for 1.5 hour sessions. Classes are typically held right after school, for example, 3:45 to 5:15. For students who meet at the school, transportation home is usually provided by the school or we pay for a taxi service to take the students home, after the tutorials. If parents prefer, we can see their child at our office for 1:1 tutorials and parents are then responsible for transportation. We use explicit, direct, incremental, systematic research-based instruction in teaching basic reading, language arts and math skills. Wilson Reading Program, LANGUAGE! and MATH*Ability are the main curriculums we use to help students reach their academic goals. All instructional materials are provided for the teachers and students. We do benchmark assessments throughout the program to ensure that students are making appropriate scholastic growth. Progress reports are sent home on a monthly basis, so that parents know how their child is making headway. We normally have 2 pizza parties during the 30-hour instructional period to reward attendance and celebrate student success.

Program Summary:

Back to Basics, Inc. is going into its eighth year of providing tutorial services in the metro Atlanta area, six of those years we have been offering instruction through the No Child Left Behind Program. Back To Basics, Inc. focuses on Reading, Language Arts, and Mathematics instruction for grades K-8. Our coaches work with your children one-on-one in your home or with small groups of no more than eight students in a non-competitive, nurturing environment. We offer extensive academic assessment which specifically targets your child's current academic strengths and weaknesses. Each student will then receive customized instruction based upon their individual needs. Upon completion of our program, students have shown significant and consistent improvement, often times increasing academic performance by one or two letter grades. We typically schedule two 2-hour sessions per week. These sessions are scheduled at a time that is convenient for the student, parent/guardian and the academic coach. We provide tutoring services seven days a week.

Program Summary:

Headquartered in Atlanta, the Brain Support Division of JT Carroll & Associates, LLC is an organization designed to act as a resource for skills intervention by providing additional instructional support outside of the regular school day. Our program assists students in grades Kindergarten through 12 with research-based resources aligned with with Georgia Performance/Quality Core Curriculum and national standards. Differentiated instructional methods are utilized to accommodate individual learning styles.

Individualized student needs and goals are ascertained via pre-assessments to maximize each instructional session to remediate and enrich every student's academic skills. Brain Support provides all instructional materials. The number of weekly sessions are determined by both the pre-assessment and parents. On average, sessions are two (2) hours in length and take place twice per week, or once per week on Saturdays for three (3) hours.

Program Summary:

Bridges Learning Academy is a comprehensive K-9 student tutorial service that utilizes research-based instructional strategies and curriculum, to ensure academic success, by providing tailored, one-on-one instruction to students, in the comfort of their home or through locations of their parent's choice. Our local, highly qualified tutors, combined, have over 30 years of teaching experience. Our instructors have current Georgia teaching certifications or four-year degrees in a specific content area. Instructors are competently trained and highly qualified as defined by NCLB, to serve the academic needs of a wide variety of student demographics. We specialize in educating students with disabilities (SWD). Likewise, Bridges Learning Academy instructors have expertise in the content areas of Reading, Language Arts and Mathematics. Bridges Learning Academy believes that students must be active learners, with the ability to synthesize and classify data, communicate findings, and evaluate ideas and conclusions. To support this instructional approach, students will engage in performance tasks to demonstrate mastery. This includes instructional delivery using experimenting, modeling, simulations, individualized tutoring, and computer-assisted instruction. Moreover, Bridges Learning Academy employs the use of the following instructional material: Triumph Learning: Coach, Buckle Down, Wilsons Reading System, all have proven success in raising student achievement scores. After an initial consultation and pre-diagnostic, Bridges Learning Academy will develop an academic plan, in collaboration with both the student, and parent/guardian. Services are available after school and weekends. The cost is \$60 per hour. Bridges Learning Academy Instructors map instruction to learning needs and improve student achievement. This is Bridges Learning Academy's first year as a Georgia SES Provider.

Student\Tutor Ratio:	5:1
Max. Number of Students (all districts):	500
Min. Number of Students (each district):	30
Cost to District (per hour):	\$40

Program Summary:

Bright Sky Learning has provided highly-effective, research and evidence-based K-12 reading and math remedial instruction for 7 years (3 in GA SES) in a variety of urban and rural settings, with Title I, ELL, At-Risk, SWD, and Alternative Education students. The dynamic, multi-sensory program is based on locating gaps in student knowledge through pre-assessments and designed to bring students up to or above age/grade level while increasing metacognitive abilities, confidence and self-esteem. Parents/guardians receive an orientation and are continuously informed about their child's progress and ways they can encourage and help. Student Learning Plans with specific achievement goals are aligned with district instructional programs and for each student (based on IEPs and 504 plans), collaboratively developed from assessment, school, parent and student information, and designed to meet individual student needs, in accordance with Georgia DOE standards. The program utilizes embedded assessments to continually monitor progress and post-assessments to determine achievement attained. Delivery locations are in schools, faith-based organizations or community centers accessible to eligible schools. BSL complies with the ADA requirements by ensuring tutoring locations are accessible to SWD and have adequate safety procedures. The student to tutor ratio is 5:1 and the program runs approximately 25-30 hours. Afterschool tutoring sessions are 1 or 1.5 hours, 2 or 3 times per week, or 1 3-hour session on Saturday. Independent research of the reading program has shown students gained approximately 1.5 grade levels with 20+ hours of instruction and states: "tutoring made the largest impact on the lowest performing students - students at or below the bottom 25th percentile." For math our own research shows an average grade level increase of 1.25 with 15 hours of instruction. All curriculum materials are provided.

Program Summary:

Child & Adolescent Resource Education Services, LLC (CARES) - Monica Davis is the executive director and the primary tutor. She has eleven years experience as a teacher in public schools. Her tutoring experience includes facilitating an after-school tutoring program for two years at a school with students scoring below the state average on the IOWA and/or CRCT. Her personal achievements include raising her classes scores to above 60% in both years. She also was a facilitator and tutor of her church's volunteer tutoring program for grades three-high school. She utilized the Gwinnett County Academic Knowledge Skills to make lessons for the students. She assessed each student on an ongoing basis with informal self-made assessments as well as formal supplemental materials purchased to increase the student performance in Reading, Math, and Language Arts. All of her experience and knowledge will be utilized by CARES and also implemented with tutors she hires. Lessons will include small group instruction, a daily skill either introduced or reinforced from a previous session, individual instruction when needed and computer software and internet activities at each session. The goal is to achieve a mastery level of 80% or better on each skill. CARES will provide tutoring in the following settings: At the student's home, the tutor's home, community center, public library, and/or business with the tutor providing all materials including technology.

Cost to District (per hour): \$55

Program Summary:

Carrter, Reddy & Associates utilizes Reciprocal Teaching strategies to tutor students in reading and mathematics. In reading, depending on their age and skill level, they receive tutoring in phonics, phonemic awareness, vocabulary skills, comprehension, and oral reading fluency. English language learners receive tutoring based on their competence with English language.

In mathematics, students are tutored in specific areas based on their needs: whole numbers, numeration, fractions, decimals, percents, geometry, pre-algebra, measurement, etc. They learn specific problem-solving strategies that help them maneuver mathematical equations.

Students are tutored in small groups for 20-23 sessions lasting one-two hours. After school session times range from 3-7pm. Potential facilities include homes of students, students' school(s), community centers, faith based centers, libraries, and C & R sites.

The techniques we employ have been validated and deemed effective by reading and learning research, and studies have shown that students improve in as little as 20 days of tutoring.

Program Summary:

OUR FOCUS IS ON PERSONALIZED INSTRUCTION Challenging Failure (CF) specializes in helping students. What makes us unique is that we understand that not everyone learns the same way or at the same rate. To make sure the student succeeds, we present concepts and skills in a way that each particular student understands them. This driving belief at CF is the basis for the unique approach we use. Our certified teachers are experts at using this approach. OUR APPROACH IS UNIQUE We focus on the individual needs of each student. CF concentrates on finding and using the instructional approaches that work best for each individual student based on their personal strengths and weaknesses. Our certified teachers are experts in helping each student understand, use and master the core concepts required by the Georgia Standards. We determine where the problem is for each student and instruction targets those problems. We invite parents to attend and participate in the tutoring sessions so they can further help their child at home. We do not believe in student failure. When the student does not succeed despite regular attendance and participation, we believe the failure is ours. We work hard to find the approach that works best for each student. OUR SERVICES ARE COMPREHENSIVE Challenging Failure (CF) specializes in helping students with disabilities, students at-risk, and students served under ESOL programs to meet expectations. We provide small group instruction 1-2 times a week (up to 2 hours per session) with a 1:4 tutor-student ratio.

Program Summary:

The Monitor Enrichment Program (MEP) is a community-based after-school/summer tutorial program. The needs of each student are addressed as outlined in an individual educational achievement plan developed with input from parents and regular school teachers. Students are assessed and tutored using a scientifically research-based curriculum. All educational materials are provided. Computer lab is on site.

A Standard tutoring session is one hour on Monday-Friday after-school and/or summer. MEP is well-known for helping students improve academic achievement.

Services are provided in a safe, comfortable learning environment at the Monitor Enrichment Center located at 600 S. Monitor Drive, Fitzgerald, GA 31750.

Max. Number of Students (all districts):	1000
Min. Number of Students (each district):	10
	Cost to District (per hour): \$60

Program Summary:

Custom One-on-One, or small group tutoring, (less than an 8:1), in the student's home or pre-arranged facility. Progress occurs because of the Individualized nature of the program, while supplementing classroom work. Qualified tutors are "matched" to the student in Reading, Language Arts and/or Math. Parent insight, teacher feedback, school assessment scores, and initial pre-testing form a program blueprint, and tutoring progresses as subject mastery is achieved. Each student receives a custom Individual Student Plan & Academic Plan of Achievement and Goals, with teacher's feedback requested to assist in preparing a program for each student. Daily Lessons are prepared for each student using Georgia Performance Standards (GPS), and regular Progress Reports are provided every 2 weeks. Using a final Post-test session, test data is compared to the initial Pre-test to determine improvement for each student. Tutoring sessions are traditionally twice per week, between 1.5-2 hours, followed by a Parent Consultation. On average, improvement is one letter grade after 3 months. Student achievement improvement has averaged over 25% in Reading; Language Arts; & Math for 4 consecutive years. 6 years proven results working with at-risk and Low-Income students under the "No Child Left Behind Act".

Program Summary:

Club Z! Tutoring is the largest and most successful one-on-one in home tutoring company. Our franchise has been tutoring since 2001 and providing SES services since 2003. Our program focuses on giving every student individualized attention. Each student is provided with only the highest quality one-on-one tutoring Club Z! utilizes the Kaufman Test of Educational Achievement (KTEA), The Math Level Indicator, and the Reading Level Indicators or Georgia CRCT tests as assessments. Student goals are set in accordance with pre-assessment results, conferences with parents, conferences with classroom teachers, state curriculum standards, and each student's local curriculum.

On average, each Club Z session lasts 1-3 hours and are held 1-4 times per week. Session time and length is customized for each student's needs.

Instructional materials are directly correlated with Georgia State Standards. Materials may include lesson plans, worksheets, workbooks, newspapers, current event related topics, etc.

The Club Z! program is proven to improve student academic achievement. On average, students who complete our program will see an increase in grade level equivalency at a least 1 grade level.

Program Summary:

Club Z! In Home Tutoring Services is one of the nation's largest SES providers. Club Z! has been providing supplemental services since the company's inception in 2005. Club Z! is currently an approved SES provider in 27 states and has helped thousands of students nationwide meet their educational goals. Club Z! has a proven record of effectiveness. On average, students who complete the entire Club Z! program will see a grade level equivalency increase of a least 1 grade level in Reading and Mathematics. Club Z! offers both individualized, in-home instruction or small group instruction provided at secure public locations. In either case, Club Z! offers tutoring at times the parent has selected as most convenient to the family. Sessions are typically 1 to 2 hours in length, occurring at least twice a week. Every session, whether individual or small group, includes time for skill demonstration by the instructor, guided practice facilitated by the instructor, and independent practice by the student. The focus of each session is to go from dependency on others to independent mastery and proficiency of the skill being addressed. Club Z! works directly with parents, school district personnel, and/or classroom teachers to set initial student goals prior to the onset of instruction. Diagnostic tests from Pearson Education are used to determine student needs as well as a review of district test data. Club Z! considers every student's educational needs to be unique therefore the Club Z! curriculum is personally tailored to meet the needs of every student enrolled so that each student achieves their full potential. Each student has their own set of instructional goals, and parents receive regular feedback on their child's progress. Club Z!'s unique in-home approach allows parents convenient access to high quality services. Club Z! is here to meet all student needs.

Cost to District (per hour): \$70

Program Summary:

Cool Kids Learn, a non-profit educational organization, has provided academic tutoring and enrichment programming for 7 years. Funded in part by various children's service councils and the United Way, our programs and services have as their primary mission to help children and youth build the academic skills and the love of learning they need to succeed in school and in life. We are currently operating SES tutoring in 10 states. We have a strong history of documented test score improvement: latest (2008-9) pre- and post-test performance data indicate that students who attended our program improved reading and math skills by up to 40%, with students at greatest risk showing some of the largest gains. Participating schools also have reported better overall engagement in the learning process. Tutors meet with students at their school or nearby community location (religious or community center, library) or in the student's home. Learning plans focus on a specific set of goals, according to the report card received from the student's school and from our own evaluations. Individual learning styles are also taken into consideration, which also determine assignment to the student group best suited to match needs. Students receive personal attention and move at their own pace towards reaching their weekly and overall targets. Our own Steps to Success curricula covers all the major Reading and Math strands and engage students in fun, enriching and meaningful ways. Special accommodations are made for English Language Learners to help them come up to speed with the general school population. In an effort to help improve quality standards, we serve on Department of Education Advisory Panels in Tennessee and Florida. Cool Kids Learn has served Georgia students and their parents since school year 2006-7.

Cost to District (per hour):	\$38.65

Program Summary:

CPH Training began tutoring students in SES programs in 2007, using computer courseware employed in school systems nation-wide for 20+ years. Originally designed for classroom use, PassKey has proven effective as an in-home tutorial program for children at risk. Substantial data demonstrate the effectiveness of the program in improving academic achievement on state standards. Built-in correlations to national/state proficiency tests/standards make it easy to assign the precise lessons a student needs for optimum test and classroom performance. PassKey effectively prepares students for success in all types of testing situations which helps to improve a district's No Child Left Behind report card. Typically, sessions last for 1-2 hours/day 3 days/week. The approach is instructor-guided, technology assisted tutoring for students to improve skills in reading, writing, and mathematics. PassKey is a prescriptive learning system and includes a brief pre-test, tutorial, guided practice, and post-test. To further delineate students' needs, PassKey's built-in diagnostics will automatically assign appropriate lessons and make it easy for instructors to identify skill deficiencies in appropriate subject areas. Computers are provided to the student, as well as Internet set up and usage at no charge to the student. Courses are offered on-line and directed by site faculties at scheduled times and on-call as needed. This type of program offers flexibility to the parent, the necessary tools for program utilization, and the support that is expected of a quality program. Certified and qualified staff members are online to model and guide instruction as needed. Students must complete 35 hours of instruction as a minimum, but can receive additional hours as needed or desired. CPH consultants are a highly qualified group of educators (classroom teachers, administrators, superintendent) who have 60+ years of experience working with low-performing at-risk youth.

Program Summary:

PABS Unlimited, Inc. has a staff of highly motivated professionals who have a proven record of providing quality service in educational, private and public sector. Staff members consist of certified school administrators, instructional specialists, teachers, corporate professionals and military personnel. PABS certified instructional staff has successfully increased the academic achievement of students in the areas of mathematics, reading and writing in various LEA's in Georgia for fifteen years. Free tutoring in reading/language areas and mathematics is offered for students in grades K-12. Data can be provided for the area/school in which PABS After School Program is located.

Services are offered at school sites, businesses and other convenient public venues. PABS has proven to have a positive impact on district, state and national assessments for Title I Schools. All students will be administered a pre-test and will be tutored according to the results of the pre-test and the student's progression, using Georgia Performance Standards (GPS) measured by the CRCT and GHSGT. Students will receive individualized learning goals and objectives. Students will participate in two-hour work sessions administered twice per week.

PABS is designed to develop young minds through motivation. Students will receive individualized instruction in various formats such as software-based interactive learning and multiple strategies adapted to the individual learning style. The Program provides comprehensive assessments, quality instruction, progress reports and afternoon snacks. Lesson plans will be designed according to the state standards and will target students' individualized area(s) of weakness.

Program Summary:

Our company has been providing tutoring services for 3 years and is an experienced Supplemental Educational Services provider that has built a solid reputation among students, parents, and districts as a provider of services that are organized, of high quality, rewarding and responsive to the needs of students and parents. We offer one-on-one or small group instruction 60 minutes for 2-3 days a week to students in reading. Services are offered at the student's school, home or community center. We use certified teachers, paraprofessionals and other qualified personnel that are experienced in working with struggling students. Our instructors include special education teachers, guidance counselors, teachers that hold a reading endorsement, and tutors that are fluent in Spanish. Our process begins with communicating with parents and teachers to determine subject assessments or our own assessments. We then diagnose student needs using existing district assessments or our own assessments. We use these assessment results, along with parent and teacher feedback, to create 2 to 3 reading goals for the Student Learning Plan. Our reading curriculum correlates with the Georgia Performance Standards and has helped students improve their grades and performance on state tests. We provide students with strategies that will help them achieve long-term success. By using teacher and peer modeling, graphic organizers, and hands-on manipulatives, students with unique learning needs will benefit from our individualized approach. We create a learning environment that is enjoyable for students in order to encourage active participation and optimum mastery of skills. We also provide daily snacks, student incentives on a weekly basis, perfect attendance prizes and program completion awards to motivate students to have good attendance throughout the entire program.

Cost to District (per hour): \$55.00

Program Summary:

Dr. AI Science Education Services provides interesting and engaging science enrichment sessions that help 11th and 12th grade students understand concepts in biology, chemistry, and physics. A pre-assessment diagnostic, weekly quiz, home activity, post-assessment diagnostic, coupled with individualized learning activities are used to deliver the science enrichment curriculum and assess student learning. The sessions designed to help students pass the science portion of the GHSGT are exceptional. We helped students who failed the test previously achieve a passing score, and currently 100% of the students that complete these sessions pass the science portion of this test. We deliver 3 hours of instruction each week, which consists of 2 sessions per week, each lasting 1.5 hours. We require that at least 12 students in each LEA sign up for our services before we will begin the sessions. Dr. AI Science Education Services is in its third year as an SES provider and we remain committed to helping students understand science concepts. We enjoy helping students succeed in science and we constantly look forward to helping the next student(s).

Program Summary:

Educate Online is America's leading provider of live, personalized, at-home tutoring. Our programs in math and reading utilize individualized, direct instruction and mastery learning techniques to address each student's specific skill gaps. Educate Online has successfully served more than 50,000 students since 2002, including more than 1000 in Georgia since 2007. On average, students who complete either our math or reading program gain at least a grade level. This also positively impacts in-school performance and grades. All instruction takes place on a computer and headset provided by Educate Online. Educate Online will also arrange internet connectivity, if needed. To ensure student safety, the computers are loaded with security software embedded in the operating system only allowing students to access the Educate Online program until they complete their tutoring. Students typically take two to four 60 minute sessions each week. Using headset and computer, they will be taught by a live instructor. All sessions take place in the safety and convenience of each student's home - eliminating the need for transportation. Sessions are available seven days a week and are taught by U.S. state-certified teachers with at least two years of teaching experience. Student-to-teacher ratios do not exceed 3:1. Students take an assessment test at the beginning of the Educate Online program to provide a baseline for determining an individualized learning plan. A Prescription Monitor reviews each plan to ensure that the skills are matched up properly and the curriculum is appropriate for that student. The plan presents content areas where the student is struggling, specific skills or strategies needed and examples of skills or strategies in use. Educate Online is able to serve ELL, special education, and disabled students given their ability to perform the necessary computer related functions.

Subject(s) Served:	Reading, English, Mathematics
Grade(s) Served:	K-12
Student\Tutor Ratio:	8:1
Max. Number of Students (all districts):	225
Min. Number of Students (each district):	8
Cost to District (per hour):	\$60.00

Program Summary:

Educational Tutorial Services provides in-home tutoring services in reading, English/language arts, and mathematics. Services are available after school, on weekends, and during the summer. Group tutoring is limited to 8 students at a time. The cost is \$25 per hour, per student with a minimum of 8 students per LEA. Through a combination of customized supplemental materials (aligned to Georgia and district's content standards), sound teaching methods, and individualized learning plans, E.T.S. helps students measurably improve academic performance.

Teachers map instructions to learning needs and improve student achievement. Our pre and interim assessments by Pearson and Scholastic are designed to forecast student growth toward performance standards. They measure student progress and tie assessment to classroom instruction. Quantile measurements are used. It is our goal to provide tutoring assistance to all under achieving and low performing students to develop essential skills to meet content standards in reading, language arts, and mathematics.

Cost to District (per hour): \$65.00

Program Summary:

EduTech Cognitive Therapy provides free on-line and off-line tutoring in reading and mathematics to K-12 students. Our tutoring program utilizes a variety of fun and effective techniques that are proven to help increase the academic achievement levels of all students, including those with special educational needs (e.g., LD, ADHD, ADD, Dyslexia, at risk for failing, and ELL-Spanish-speaking).

Our highly-qualified tutors service students in schools, churches, provider site or in the home; and many are Sp. Ed. Certified. Students attend up to 6 hours per week, after school, weekends, also summer, and they receive a total of 32 hours of high-intensity tutoring in one-on-one or small group sessions. Tutors diagnose each student's needs, and prepare individualized learning plans that utilize direct tutor instruction and computer-based programs, designed to help increase academic achievement, and improvement learning and memory skills. Monthly progress is reported to parents and skills growth is measured at the end of the program.

Cost to District (per hour):	\$50

Program Summary:

The Empowerment of Minds (EOM) provides customized tutorial services for students grades K-12. In home tutoring, and online tutoring is available in Math, Reading, and English/Language Arts. EOM is designed to close academic gaps, develop test-taking strategies and assist in preparing students for the Criterion-Referenced Competency Tests (CRCT), Georgia High School Graduation Tests (GHSGT), and Georgia Alternate Assessment (GAA) state mandated test. EOM specializes in working with all identified students that qualifies under NCLB - Supplemental Educational Services including those with selected disabilities. In an effort to increase academic achievement, our program will assist in the development of the "total child". EOM small group sessions will be held at our learning center after school and on weekends with free transportation provided to selected sites. EOM fosters a safe secure environment that allows for academic growth, creativity, and character building. Our program combines technology with small group instruction to accommodate different learning modalities, along with flexibility in tutorial sites. Our tutors are certified teachers and other highly experienced educators. Students are given a pre and post assessment test to identify instructional level. Individual student skill gaps, strengths, and weaknesses are identified and are used to create a personal individual educational plan for each student. Research based best teaching practices are used to meet the individual needs of each student. Feedback is provided on student's academic progress. EOM will develop, nurture young learners, and positively influence their self-esteem. This will enable the students to have a renewed confidence and a sense of interest in learning to be successful in the classroom. Parents have reported a significant gain in grades, performance level growth on the CRCT, attendance, and self esteem as a result of their child completing EOM.

Program Summary:

The Director of Get Smart Consulting has over 24 years as an educator providing instructional strategies to improve the academic success of students. The program will utilize these proven strategies to encourage these same results in our students. We promote the incorporation of hands-on experiences and instruct tutors on using a Learning-Focused approach which utilizes graphic organizers, daily assessments, and writing to promote comprehension. This approach has proven highly effective with varying at-potential populations. Materials used will include workbooks correlated to Georgia Standards and additional resource materials which allow for adequate practice of skills. Get Smart Consulting's program is flexible and accessible to meet the needs of parents. Services are provided at school, in community locations, and in-home as approved by the director. Tutoring may be held between the hours of 3:00 p.m. - 9:00 p.m. weekdays and up to 3 hours on weekends. Tutoring may be conducted 2-3 days per week. Transportation is provided for select locations. Get Smart Consulting will work with the parent/school to ensure that the instructional goals set are in-line with areas of concern. Interviews will be conducted with parents prior to service; available school documentation will be reviewed, and pre-testing results will be analyzed. On-going benchmark testing will be utilized to determine retention of instruction and the need for re-teaching. Although Get Smart Consulting had provided SES services for one year, It is important to note that our Director has worked with other companies and LEA's providing services for 8 years.

Max. Number of Students (all districts): 500

Min. Number of Students (each district): 20

Cost to District (per hour): \$40-\$60

Program Summary:

For the past five years, Graham Consulting Group, LLC has offered In-home or small group tutorial programs to over 350 low-income students and families beyond the normal scope of school-based educational programs. Our tutorials have shown positive academic growth in several areas. For example, 90% of all students who have enrolled in our SAT/ACT preparation tutorials have achieved an increase of at least 250 points on their future standardized exams. In addition, 91% of all students who have participated in our Georgia High School Graduation Test tutorials have attained a minimal passing score in all subject areas. Moreover, 89% showed improvement in reading comprehension, while 95% showed improvement in Math. Our tutorials increase student academic achievement by providing a detailed curriculum that is aligned with the grade and subject specific Georgia Performance Standards (GPS). Our tutorial program will drive students to mastery in the following areas: reading, English, and mathematics. Students are tutored in one-on-one/small group settings following an instructional plan based on their strengths and needs. Using the students diagnostic test results, an individualized learning plan includes our recommended instructional program, based on the student's individual needs. Our program is structured to give students 2-hour bi-weekly tutorials for a total of 15 weeks or 30 hours. The first and last two hours will be utilized for pre and post testing. Furthermore, instructors at Graham Consulting Group, LLC will have access to various technological resources including tape/CD players, grade appropriate books on tape, various listening activities and hands on manipulatives to assist in their tutorials. Graham Consulting Group, LLC has been an approved SES Tutorial provider for the past three years.

Min. Number of Students (each district): 7

Cost to District (per hour): \$50

Program Summary:

In 2002, in an effort to reach out and accelerate the achievement of at-risk students, the GF CDC established an educational remedial program to teach, mentor, and tutor elementary school children living in poverty, within the Metro Atlanta Public School System. Our tutorial services are interactive and focus on the core academic subjects of Reading, Mathematics, and Language Arts for grades 1 through 12. Our instruction will emphasize skills to help all students achieve school success and pass promotional test objectives that the state requires. Certified teachers and highly qualified tutors will work with students on a one-on-one basis and in small group settings to ensure student success. Our program offers personalized student learning plans, innovative and unique techniques to reach students, access to computer based learning, comprehensive assessments, weekly and monthly progress reports to parents and teachers, on-going evaluations, and nutritional snacks. Tutorial services will be held at the Greenforest-McCalep Academic Center which is convenient, safe, and conducive to learning. The tutorial schedule includes a Saturday, three-hour tutoring session from 9 a.m. until 12 noon. Our tutorial instruction and educational materials are consistent with Georgia Performance Standards as well as the National Reading Panel (NRP) and the National Council of Mathematics. They are high quality and based on the most current knowledge of what promotes student success. Our instructional techniques have been successful in helping students at a low-achieving Metro-Atlanta school pass the CRCT (standardized test) that resulted in the school being removed from the list of schools not making the state's Adequate Yearly Progress (AYP). The Green Forest CDC was first approved as an SES provider for the 2003-2004 school year. We are currently completing our fourth year of service to students of Atlanta, Clayton, DeKalb, and Fulton County School Systems.

Program Summary:

Daughtry Elementary School provides instruction using a variety of instructional strategies designed to engage students and meet their needs by providing differentiated instruction based on individual needs. Needs are determined by a pre-test given to each student prior to enrollment in the program. Small group, one-on-one, and computer assisted instruction are used as models of instruction. Goals are set for the targeted student population to improve academic achievement. Bi-weekly progress reports are sent to parents to record student progress toward the goals. Results of the CRCT are used to determine the effectiveness of our program. During the school year, the program will be conducted after school from 3:40 pm to 5:40 pm for a two hour session. Tutoring will be offered two days a week. For the summer supplemental services program, the classes will be held five days a week from 8:30 am to 12:30 pm for a total of four hours a day and twenty hours per week. Facilities will be provided at the Henderson Middle School.

Program Summary:

The National Reading Panel fully supports the fundamental concepts and instructional design of our materials. The mathematics program meets the most rigorous academic content standards with proven results while it ensures universal access to a diverse group of learners incorporating the curricula of Math I-IV. Our approach is to identify the students' academic need with an assessment and develop an individualized learning plan which is taught by qualified instructors. Effective instructional strategies employed in our program are specifically designed to provide instruction that is systematic, and intensive. Students are engaged in activities that provide opportunities for direct instruction, guided practice, review, independent practice and application. We use positive reinforcement to help students' gain self-esteem, independence and improve academic performance. With over 20 years of experience as an educational consulting firm and nearly 6 years as a Georgia SES provider, our record of effectiveness has shown a positive impact with over 70% of students passing the CRCT, EOCT, and/or GHSGT, and with nearly 80% of students improving academic grades. Monthly progress reports are distributed to school/parents which indicates students' mastery of skills of the Georgia Performance Standards. Sessions are conducted in small groups for 2 hours twice/week Monday-Thursday and/or on Saturday at locations in the school district such as: library, local school, community center and with a select number of home instruction slots available.

Program Summary:

HireOrder Thinking Inc.(HOT) has over 3 years of expertise servicing students with reading and/or spelling deficits. HOT focuses on Reading, Spelling, and Language Arts instruction for grades 2-12 supporting NCLB, using certified staff, and following GPS standards. Wilson Reading System (WRS) addresses students with language-based learning disabilities, struggling readers and spellers, the "at-risk" population, and English as Second Language (ESOL) learners. WRS instruction component areas are: Reading-Phonemic segmentation, Alphabetic Principle-sound/symbol relationships, Decoding, Encoding (spelling), Advanced Word Analysis, Vocabulary Development, Sight Word Instruction, Fluency, Comprehension with Visualization, and Metacognition. WRS explicitly teaches direct, structured, cumulative, multisensory, and integrated lessons that work! The program offers over 20 years of research-based, literacy and academic achievements with students one-on-one in their home, at a local community library or in small groups with teacher/student ratios of 1:5 or less at our company location; HOT supplies student materials. Pre- and Post-assessments are used specifically to target each child's current academic strengths and weaknesses in reading, along with on-going curriculum-based assessments and progress reports to monitor student needs. Individualized student plans (ISP) are developed from assessments and standardized data. WRS can improve overall academic grades, increase students percentiles of mastery on IEP or RTI plans, and 'close the educational gap.' Students will show significant and consistent improvement at the end of their program, often times increasing academic performance by two letter grades. Recommended scheduling is three to five 45 to 90 minute sessions per week; to see equivalent gains in a service period of typically 30 sessions. Sessions are scheduled conveniently for the student, parent and the tutor seven days a week, year-round.

Program Summary:

I Know I Can Academy offers high-quality, systemic, intensive, and research-based instruction that has been proven to increase student achievement. Our program is designed for students in grades K-12. We offer a flexible tutoring schedule that can take place after-school or on weekends. We have highly trained staff members including, but not limited to general education teachers, school psychologists, Exceptional Student Education teachers, etc.

Our Executive Staff has over 100 years of combined experience in education. I Know I Can Academy uses pre and post tests to identify the skill deficits of each student and we target those areas in order to increase academic achievement. The tutoring takes place either at the school site or at nearby locations such as the library or a community center. We also give our students snacks. In order to keep parents and school personnel informed of our student's progress, we generate progress reports on a monthly basis.

We have a proven track record of increasing the achievement of students. Our motto is "Our Students Are Destined 2 Succeed." Not only do we remediate skills in Reading/Language Arts and Math, but we also work hard to increase the self-esteem of each of our students.

Program Summary:

International After School Program is a high quality computer-based tutorial and enrichment program. Parents select our onsite, home-based distance learning and/or correspondence tutorial program for their child. We are specifically effective working with students in Grades 2-12 in English, Language Arts, and Mathematics. We strengthen the student's cognitive ability by setting grade level academic goals and focused learning objectives. Our program uses the Internet, Computers, Technology, Distance Learning and Correspondence to deliver our instructional program. We provide the students with the necessary computer as a part of their materials package to complete their computer-based instructional program from home. Our program offers flexible scheduling options for participants and we work with parents to tailor the 2-4 hours of tutorials per week. Our educational team has been working with students since 1997 and we have been providing tutorial services in Georgia since 2007. Please visit our website at WWW.IASPGEORGIA.COM for more details or contact us at 1-800-723-9802 or 912-376-0611.

Program Summary:

The Key Enhancement Learning Center (KELC) provides high quality, research-based tutoring that is designed to increase student achievement. We help students reach their potential by building on strengths, remediating skill deficits and utilizing strategies that help encourage academic and social success.

Key Enhancement specialize in helping children master academic skills, get better grades, achieve higher standardized test scores, and gain the confidence and motivation needed to succeed inside and outside the classroom. Our instructional strategies include: Individualized One to One Instruction, Small Group learning, Peer Tutoring and a Positive Learning Environment. Students are tutored Monday thru Thursday after school for two hours each day, weekends from 8:00am - 12:00pm., and during summer Monday-Thursday for 4 hours each day.

Key Enhancement also utilizes computer-base assessments, and tutorials such as AAA Math, RHL School, Teach-nology, and Reading Comprehension Connections. In addition, Key Enhancement utilizes the Criterion Reference Competency Test (CRCT) tutorial websites.

Program Summary:

The Kinetic Potential Learning System (KPLS) is an innovative youth development program that has been addressing the comprehensive needs of at-risk youth over the past two years. Founded upon the belief that every child has remarkable potential, KPLS provides a roadmap for these students, the KP scholars. KPLS matches each and every student with academic KP Tutors as well as Guidance and Career mentors. KPLS' goal for its students is three fold: Improve the Quality of Education-By recruiting its KP Tutors from America's top graduate universities in education-including those from Harvard, Penn, and Yale-KPLS not only selects from a pool of highly qualified instructors, but also brings on board individuals who are specifically committed to providing at-risk students with equal educational opportunities. KP Tutors lead groups of 8-10 students for one hour sessions anywhere from 2-4 times a week in the core subjects of math/language arts. Improved Student Motivation-Kineticville, KPLS' cutting-edge virtual world, uses 3D video game technology, streaming digital video, and detailed avatar designs to drop students into a truly hands-on learning environment. In this virtual environment, students learn by doing and exploring, not simply by memorizing and reciting facts. The learning experience is designed to engage students as the most popular video games. Provide More Individual Attention-Students struggling academically need more attention both academically and socially. KPLS creates an individualized portfolio for every one of its KP Scholars, outlining their unique academic, social, and professional goals. KPLS believes that students need to not only understand what they are learning, but also how it relates to their own lives and career plans. KPLS pairs every KP Scholar with up to five Mentors to help students prepare for their long-term goals and to become life-long learners.

Program Summary:

KIP Learning is a tutorial service that has served the Lithonia area for nearly 10 years. At KIP Learning we believe that "Education in not received. It is Achieved." KIP's students will undergo a diagnostic assessment, which includes reading and mathematics. These tests help evaluate each student's strengths and weaknesses and are ligned with Georgia Performance Standards. This test will be analyzed by the director and teacher to develop an Individual Student Plan (ISP) customized based on skills and knowledge gaps. Students will meet twice a week for two hours with an eight-to-one pupil/teacher ratio. Kip will provide all materials needed for each tutorial session. Classes will be held Monday through Thursday after school and during the summer months. To ensure that academic achievement is accomplished, KIP tutorial program involves mastery learning.

Program Summary:

KnowledgePoints - Lithia Springs has been providing tutoring services to students in Georgia for two years. Our KnowledgePoints' Director of Learning is a certified teacher, and has completed extensive training. The student takes a battery of diagnostic tests which identifies their specific needs. An individual learning plan is written using our library of more than 20,000 lessons from nationally recognized publishers including McGraw-Hill. Each student's plan is unique and reviewed with the parent(s) to establish agreed goals. Students attend between 2-4 sessions weekly. Each session is for 1 or 2 hours in length, and is offered after each school day, with no homework. Our unique motivational system provides positive reinforcement. Individual learning is reviewed and updated after every session. When a student masters a new skill, they immediately move up to the next level. Parents are updated at least biweekly, and teacher and the school district monthly. An independent study shows that our program is highly effective for students of all ethnic and gender groups.

Cost to District (per hour):	\$45-\$56

Program Summary:

KnowledgePoints provides individualized tutoring services in the core learning skills of reading and math to grades K through 12. Our process involves a battery of tests to identify a student's weaknesses, the design of an academic curriculum for that student, and the delivery of tutoring services by state certified teachers. The student's goals for tutoring are set during an initial conference with parents, where test results are reviewed in detail. KnowledgePoints uses educational materials from the leading publishers in the U.S., including McGraw-Hill. Tutoring sessions last 1 to 2 hours in a highly interactive session where the student works closely with the tutor. A session consists of 4 to 8 activities designed at the skill and age level of the student. This means immediate success as the student learns. A motivational system insures a student's ongoing interest and participation. KnowledgePoints has been tutoring for 5 years in the Atlanta area and has been qualified for SES services for 3 years. Our results show growth of one and a half years in reading and two years in math during the initial 40 hours of tutoring!

Min. Number of Students (each district): 1

Cost to District (per hour): \$50

Program Summary:

Monroe Elementary School (MES) Learning Enrichment Assistance Program (LEAP) has a seven year history of successfully tutoring struggling students. MES started LEAP in 2002 when it was designated as Needs Improvement. Research-based strategies and best practices were used in designing LEAP. With the help of LEAP MES is now a Georgia Title I Distinguished School - Year 2 and a 2008 Bronze Award Recipient for Greatest Gain in Student Meeting and Exceeding Standards. LEAP uses the research-based Teach Them to Read (TT2R) English/Language Arts and Reading curricula and research-based A+nyWhere (A+LS) Learning System: Mathematics Curriculum (Computer Assisted). LEAP SES tutoring meets twice a week for 1.5 hours a session for individual or small group tutoring. Overall the LEAP program structure, practice and procedure follows best practices as outlined in The Afterschool Training Toolkit, Quality Afterschool Learning. Specific product curricula and lesson plans are strictly followed by qualified and trained tutors. Students are assigned to English/LA, Reading or Math tutoring base on needs as determined by CRCT, ITBS, EOCT and other school assessments. Students receiving English/LA tutoring are given an assessment to determine specific areas of need. Students receiving Math take a computerized assessment. The A+LS provides a prescriptive course of study based on the assessment. A qualified and trained lead tutor along with the tutor, parent, and student uses the assessment to set goals in Individual Student Plans (ISP). All tutoring will take place at Carver Middle and Monroe Area High School. Each school's computer lab will be used for A+LS and classrooms will be used for English/LA tutoring. Software is loaded and available for tutoring at each school. TT2R materials and lesson plans for English/LA and Reading are on site and available. MES will be a first year SES provider but has been providing tutoring for seven years.

Program Summary:

Our company specializes in preparing 11th and 12th grades for the Georgia High School Graduation Test (GHS GT). Since 2004, we have helped students successfully pass the GHS GT. We have served regular education, special education, and ESL students gain the knowledge and skills necessary to pass the test. As a SES provider since 2006, our company has served students in the areas of English, mathematics, science, and social studies. Over 80% of students enrolled in our tutorial program passed the test. And over 95% increased their score. The tutorial program is very structured and comprehensive and takes up to 30 hours to complete. Students usually attend 10 sessions once a week for 3 hours per session or 20 sessions two days per week for 90 minutes per session. We allow students up to three (3) additional weeks to complete the tutorial program if they have exhausted their SES allotment before they take the GHS GT in March. Students are provided with all study materials (workbooks, notebooks, pencils, graphing paper, calculators, etc.). Tutorial sessions are held at our primary business location, public library, and/or the local school. Locations vary by school district. The teacher-student ratio is 8:1. In past years, ESL and students with disabilities received one-on-one tutoring. However, this is done on a case-by-case basis. Also, as an added benefit to our students, our certified counselor prepares VARIANCE LETTERS for eligible students. Our company has a 100% success rate with variance letter approvals.

Program Summary:

The Learning Station's owner has over ten years of experience, in teaching and tutoring. The company's owner is employed with Fulton County Schools, as an Early Intervention Program Teacher, where increasing student achievement in reading and math is the focus for struggling students. The Learning Station is a researched- based company that supports student achievement in reading and math in grades K-12. Instruction is delivered in two ways one-on-one or small group formats. Our company's data shows that eighty percent of our clients working below grade level and/or struggling academically exited the program working on grade level and mastered state standards. We use resources that are research-based, support NCLB, Reading First Initiative, and formative assessments. Our session begins with a pretest and results are reviewed with the student. The tutor then conducts a teacher directed modeled lesson. Finally, the student applies the standard learned by completing an independent activity to check for mastery. The Learning Station offers a variety of session models. Clients attend sessions Monday - Saturday. Session times range from 1-2 hours. Sessions are held 1-2 times per week. Students that show academic gains typically receive a minimum of 2 hours of tutoring per week. The Learning Station provides tutoring at 315 Hwy 314 Suite B in Fayetteville, GA. Tutors will use laptops to administer various assessments using a formative assessment aligned to GPS. In addition, student will receive teacher directed lessons and access online resources which are also aligned to GPS, which provides all our students with strategies needed to reinforce standards learned to gained mastery. All instructional materials are provided to students during all sessions.

Program Summary:

M.O.R.E. Learning, which stands for Multiple Opportunities for Remediation and Enrichment, uses a research-based curriculum that is guaranteed to provide improvement in student achievement. The director of M.O.R.E is a nationally board certified educator who brings her knowledge of best teaching practices to families across the state. The company has served Georgia students for four years. M.O.R.E has served as an SES Provider for three years. We use a specialized test to determine student needs and work with children at their level. Our goal is to make sure that all children we serve are able to perform at or above grade level each year of their schooling. Education is our highest priority, and we ensure that all children are treated as we would treat our own. Standard tutoring sessions last two hours a day, two days a week for approximately eight weeks at local school sites. The teacher:student ratio is set for 1:8 in each class, but most classes have no more than five students at one time. Tests are taken online to determine student needs. Students are provided personal workbooks to use that are selected for their particular needs. All of our teachers are highly qualified persons who possess teach certification and/or meet rigorous teaching criteria.

Program Summary:

Mainly Math provides quality tutoring in all subjects allowed by the SES program. The owner and lead tutor has been tutoring over 20 years and has taught in both public and private schools. Mainly Math has been providing tutoring for SES for 5 years. We provide proven research based quality instruction for our students including the latest technology and teaching materials. The majority of our students have thanked us for not only improving their child's test scores but also their understanding of the material and their increased love of learning. Most tutoring is done one on one in the student's home or local library. Tutoring is usually on hour, once a week but we are flexible to the needs of the child and parents and schedules are very flexible. A pre-assessment is done on each child, this is used in addition to input from the child, parents, teachers, and school records to create an individual plan focused on that child's particular needs.

Program Summary:

Our tutoring program focuses on reading, language arts, and mathematics for grades K-8 using highly qualified and caring teachers. We believe the key to effective tutoring is the maintenance of small group learning environments with a maximum 1:7 teacher-student ratio. Each child's individual academic plan is carefully constructed using diagnostic information and parent input and instruction is designed to address student needs. Parents receive monthly progress reports and frequent contact with our staff. Our tutoring program is available before and after school with 1.5 - 3.0 hours of service available per week. Our program has a 29-year history of proven positive results with over 4,600 students served in 64 school districts in 5 states for the 2006-2007 school year.

Program Summary:

New Generation Academy (NGA) was founded on the principle, "All children can learn if given the right tools and opportunity." While there are many educational tools available, NGA has chosen the Jamestown Reading Navigator (JRN) program to use. The JRN curriculum has shown remarkable success in engaging reluctant and/or struggling readers. JRN uses high-interest materials, current events, and bold graphics, along with cutting edge technology to appeal to students. NGA believes the student's ability to comprehend and read on grade level are important components of his/her academic success. Studies show good readers make better history, language arts, science, and even math teachers. The JRN curriculum applies this philosophy in the "reading across curriculum" technique which is prevalent throughout their material. NGA also believes that every child is unique. Students who attend NGA are individually assessed and a customized academic plan is implemented for each student. A self-paced curriculum that incorporates one-on-one tutoring with supplemental group activities is used. NGA has a proven track record of significantly improving student academic performance. Many students who completed the program have gone on to receive various scholarships including the HOPE Scholarship. In addition to our dedication to each student, we credit our students' achievements to the commitment to the program and parent support. We welcome the opportunity to work with you in helping your student pursue academic success. Specific tutoring times will be worked out between parents and tutor, however, your child's success will require that we meet at least 2 to 3 times per week with sessions lasting 1 to 2 hours.

Program Summary:

Next Level Learning has provided academic tutoring and enrichment programming for 5 years. Our programs and services have as their primary mission to help children and youth build the academic skills and the love of learning they need to succeed in school and in life. We are currently operating SES tutoring in 6 states. We have a strong history of documented test score improvement: latest (2008-9) pre- and post-test performance data indicate that students who attended our program improved reading and math skills by up to 40%, with students at greatest risk showing some of the largest gains. Participating schools also have reported better overall engagement in the learning process. Tutors meet with students at their school or nearby community location (religious or community center, library) or in the student's home. Learning plans focus on a specific set of goals, according to the report card received from the student's school and from our own evaluations. Individual learning styles are also taken into consideration, which also determine assignment to the student group best suited to match needs. Students receive personal attention and move at their own pace towards reaching their weekly and overall targets. Our own Steps to Success curricula cover all the major Reading and Math strands and engage students in fun, enriching and meaningful ways. Special accommodations are made for English Language Learners to help them come up to speed with the general school population.

Max. Number of Students (all districts): 100

Min. Number of Students (each district): 15

Cost to District (per hour): \$55.00

Program Summary:

Phyl 's Academy Preparatory services are as follows: Summer Tutorial, After-School Tutorial, and In-School Individualized Tutorial. These programs have been offered successfully for the past 20 years and have helped low performing students that were failing.

We will pre-test using the assessment tools that are part of the computer based software curriculum.

The length of the tutoring session will be one hour and the tutorial sessions will be held twice per week for 15 weeks per student.

We will utilize the TEACH method for direct instruction of identified skill needs. Each identified skill will be pre-taught by the tutor and then reinforcement of the skill will be turned over to the computer-based software. Tutoring sessions will be tailored to each student's academic level and needs as the curriculum (Study Island) parallels the Georgia Performance Standards. The ISP will be for the identifiable student area of weakness. We will utilize school reports, the pre-test, and any other needed batteries that may help to indicate what those weaknesses are. These goals will be translated into short term objectives that will enable us to create a timeline. We will use our own local facility, a school with a computer lab, media center, classrooms, and playgrounds and a church school facility. We will use a computer-based software system called Study Island, a research-based program that parallels the Georgia Performance Standards and CRCT exams in the areas of reading, language arts, and math for K-6th grade. This will be used along with appropriate visuals and manipulative which will help to reinforce taught concepts.

Min. Number of Students (each district):	15
Cost to District (per hour):	\$50

Program Summary:

Reach for Tomorrow (RFT) has been an approved SES provider in 15 states for grades K-12 for the past 3 years. Students have shown an average grade level gain of 2 or more grade levels in English Language Arts and Math in less than 30 hours. Extralearning Online is used to deliver instruction to students which is a self-paced, individualized, web based, computer delivered, secular, neutral, and non-ideological mastery learning program for grades K-12.

Tutoring sessions are 1 hour after school for up to 4 days per week using school based computers and the Internet- no software required. RFT uses only local teachers who are trained on the program to work with students using customized curricula for each student. Students are assessed using criteria based tests embedded in the program for grades K-12 as well as nationally normed Test of Adult Basic Education (TABE) for grades 5-12. Individual Programs of Study are created to set goals for improvement of at least .5 grade level in English/Language Arts and 1 grade level in Math.

Each lesson progresses as follows: read a text book, providing instructional content in small segments; questions to check the student's understanding of what they have read; a short lesson quiz to measure their level of mastery of the lesson; and activities to reinforce the content presented in the book such as hands on activities such as BrainPops (interactive animated shorts) for the kinesthetic learner and streaming videos for the visual learner to further expand the content presented in the book. The lesson ends at the completion of these visual assignments, and the student moves on to the next lesson. Each student may work with a live tutor online from after school until midnight 7 days per week to assist with homework at no cost.

Min. Number of Students (each district): 1

Cost to District (per hour): \$50

Program Summary:

Reading, Phonics, Math & More has been in business for 8 years and has been an SES provider since 2006-2007. Students are given a Preliminary Skills Assessment to determine their current level of functional proficiency. RPM has demonstrated increases in student achievement when the students attend regularly and parents are involved. A conference is held with the parents to review the results of the testing and to introduce them to the individualized program of instruction RPM has developed for their child. Instruction is done by certified teachers who currently work in or are retired from the area school systems. Students are taught in very small groups of 4 students to one teacher for grades 4 and above, and 1 on 1 instruction for students in kindergarten through 3rd grade. The child attends the program 1.5 hours, 2 days a week, for a total of 3-4 hours a week to receive individualized instruction in reading and math. The program has been very successful at improving the reading and math skills of all of the students, assisting students in passing CRCT exams, GHSGT, and increasing the self confidence of the student. The facility is newly constructed and provides a spacious learning environment for all students.

Program Summary:

The Reef House After-School Program offers children the opportunity to boost their grades in reading, language arts and math, by participating in a uniquely active learning experience. Using the Georgia Performance Standards (GPS) measured by the CRCT and GHSGT, our students receive individualized learning goals and objectives and participate in two-hour work sessions, twice per week or more (as needed). For over seven years, special success has been achieved at the Reef House where we believe that education is vital for success. Our 3,500 square foot facility boasts five educational spaces, a computer lab, library, multimedia, recreation, and group discussion room. Snacks are provided to all students, transportation is available for select schools, and incentives are given for outstanding performance.

Program Summary:

Refugee Family Services has been serving refugee and immigrant students in DeKalb School System Schools for 10+ years with afterschool and student support services. We are now expanding to include specialized tutoring in Reading, English language, and vocabulary to students whose first language is not English in Needs Improvement Schools. Small groups of students will be led by trained personnel in a schedule that enables students to engage in setting learning goals and improve academic skills through research based curriculum. Sessions will be an average of 2 hours per session and take place once or twice per week. All students will be further supported by a multilingual and multicultural staff of school liaisons, who will ensure that parents are informed of the child's progress on a regular basis.

Program Summary:

Reunited's educational staff has over 50 years combined experience in educational services. As a new Georgia SES Provider Reunited's staff has collectively developed instructional methods that are student-centered and researched based. Tutoring sessions include small group (8:1) or 1:1 instruction depending on students' needs. We offer a curriculum that is very "hands-on" and interactive to deepen students' understanding of subject matter and hold their interest. Our reading recovery program integrates the reading process, comprehension, vocabulary, fluency, and writing and is designed to motivate students to read for both information and enjoyment. Our math program helps students build their basic math skills and learn skills and concepts crucial to achieving grade-level success.

Tutoring sessions are offered twice per week for one and a half hours at the student's neighborhood school, or in their home. Alternatively, students may elect to attend a three hour tutoring session on Saturday mornings at our office, or a satellite location.

Program Summary:

The Saved by the Bell Supplemental Education Service Center proposed by S & V Educational Systems, Inc. will offer instruction in reading/language arts and math in the Bibb County Middle Georgia area. Utilizing the Direct Instruction model, the Saved by the Bell program will be an effective intervention for students struggling to meet performance standards.

The instructional program has been designed to address the individual needs of each of the participating schools. Although the services provided will be similar across LEA sites, the improved outcomes will specifically address the immediate needs defined by each of the sites. The program will operate three hours a day Monday thru Thursday from 4:00pm-7:00pm (12 hours/week). The summer program will operate daily 9:00am-1:00pm for 4 weeks prior to the opening of school.

Program Summary:

Solid Rock Academy is a licensed, SACS accredited school that has experience tutoring students for 20 plus years. The academy has serviced the state of Georgia as a SES provider for five years. The program of service offered is consistent with the instruction program of the LEA's and the Georgia Performance Standards. For the SES, the academy reviews students' records and CRCT test score results to develop an individualized tutorial program meeting the specific needs of each student to increase academic achievement. The academy will also administer Pre and Post assessments and the IOWA Test of Basic Skills to measure student's individual academic needs. Specific achievement goals are outlined for students in consultation with the LEA's and their parents. Progress reports are provided monthly to LEA's, teachers, and parents. The reports are language appropriate and describe the extent to which student's goals and objectives have been mastered. Tutoring sessions includes (2 subjects (Math and Language Arts/Reading): 2 hours each; 2 times per week) with a maximum of 4 hours per week. After school sessions range from 3:00 p.m. - 7:00 p.m. Saturday sessions from 8:00 a.m. - 12 p.m. Summer sessions are 8:00 a.m. - 6:00 p.m. Our facility, equipment and materials encourage active student participation using current websites from textbooks, vitruat websites, and the Georgia Performance Standards. The computer-assisted instruction produces higher achievement and lasting retention, and allows teacher-student interaction and interaction with web-based materials.

Program Summary:

Star Cooper, Inc. enrichment services concentrates on assisting students in grades K-12 with achieving high scores in the subjects of Reading, Language Arts, and Math. Emphasis is placed on acquisition of comprehension through practice, repetition, drill, and memorization. Perseverance is the key to our highly effective program. We never give up! Equipped with over 32 years of instructional experience, our tutors understand that "Beliefs Affect Our Focus" - we have positive beliefs about our students. Our uniquely designed tutorial program implements the New Georgia Performance Standards and is proven to effectively improve academic achievement. Initially, we assess the students to identify deficient skills. Through a collaborative effort with parents and students, an Individual Student Plan (ISP) is developed and a personal portfolio is created for the student. Portfolios contain ISPs, signed student contracts, pre-established goals with time lines, student work, bi-weekly assessments, and progress reports. In order for our program to be successful, 1.5 hours, twice per week is mandatory. Additional sessions can also be arranged to increase retention levels and allot more time for one-on-one instruction when there is a group setting. Sessions are conducted after school, on the weekend, and during summer months at or office or at one of our satellite locations, i.e. local library, church, or community center. The first 10 minutes of every session entails a recap followed by speed and comprehension drills. Within the next hour we focus on new material and conduct practice activities. The final 20 minutes includes wrap up activities and mini assessments. We incorporate the use of workbooks, computer based software programs, worksheets, study guide handouts, and a variety of hands on activities to provide a broad range of approaches. All supplies such as paper and pencils are provided. In addition, snacks are available free of charge for the students.

Program Summary:

Founded in 2006, Stepping Stones to Success (SSS) is a highly regarded SES-approved provider operating in Northwest Florida. SSS's strength lies in this small, privately-held company's commitment to quality and evidence-based instruction by dedicated instructors. The effectiveness of our program in improving students' performance is evidenced by the incremental gains in test scores we have experienced each of the last three years. The structure of a standard tutoring session is 1.5 hours, twice a week. Tutorial sessions will be offered after school and weekends. Our approach to instruction includes making an initial assessment of student strengths and growth opportunities, using not only available test scores, but input from students, parent/guardians and school representatives. Only after this information is collected, do we proceed with developing an individual learning plan for each student that reflects the involvement of all involved parties. Instructional materials are provided by SSS. To promote standards-based instruction, tutors routinely make appropriate references to Georgia Performance Standards while tutoring students. Use of technology during the actual tutoring session occurs based on the tutor's assessment of the student's most effective style of learning.

Program Summary:

Sylvan Learning Center has been providing tutoring to more than 2 million students over 25 years. Our instruction is based on individual students' academic assessments. Based on the results of these assessments, we design a program that highlights and addresses an individual students' academic needs. Then once we have determined the specific academic needs of a student, through mastery learning we remediate skill gaps. Our materials encompass a wide variety of research based and nationally recognized books, hands-on manipulatives and computer software. We meet with parents at least once a month and discuss their child's growth and progress in our program. We evaluate academic growth every thirty-six hours with a progress test that is a nationally recognized test of achievement. Our approach to Supplemental Education is based on reliable research, common sense, and best practices. A minimum of 40 students per district must enroll in order for the program to begin.

Program Summary:

Sylvan Learning Center has provided tutoring to more than two million students over 25 years. Our instruction is based on individual student academic assessments. Through mastery learning we remediate skill gaps; through personalized lesson plans, we enhance academic achievement and increase confidence. The tests administered depend on the type of program necessary for supplementing academic achievement in reading, math, or language arts. These tests include word analysis testing, California Achievement testing, the Gray Oral Reading Test, and a receptive/expressive vocabulary assessment. Each student's program includes generalized long term goals as well as specific short term goals that directly align with the current Georgia Performance Standards. All instructional materials are provided at the teaching facility. In addition to the diagnostic testing, a progress test is administered at the conclusion of the supplemental program. A standard tutoring session is one to two hours in length. Students have the option to attend one or two days per week. The teaching schedule is Monday-Thursday, 4:00-7:00 pm, and Saturday, 9:30-1:30 pm. The facility is located at 3312 Northside Dr., A-115, Macon, GA. Sylvan Learning Center has six years experience as a Georgia SES Provider.

---	--

Program Summary:

Sylvan Learning Center of Augusta has provided diagnostic, prescriptive, individualized programs of instruction in reading and math for the past twenty-one years and for the past four years as an SES provider for NCLB students. We have a proven history of success. Sylvan Learning Centers nationwide are the leaders in supplemental programs in reading, math, and more! Our reading students average growth, measured by standardized achievement testing, in 36 hours of instruction is 1.1 grade equivalent on progress tests, and our math students improve by 1.3 grade equivalent. Parents recognize improvement in confidence and independence. We begin by providing a diagnostic assessment, using a state standardized test, to evaluate the mastery of critical grade level skills, and to identify skill needs. Then an individualized program of instruction targeting the skills not yet mastered is developed. We provide teacher guided instruction, practice, and assessment for mastery. Sylvan provides a mastery learning program requiring that skills are mastered before advancing to more advanced skills. Instruction is delivered in a three on one student/teacher ratio. Each student has their own individualized program which is updated daily by a Director of Education to determine mastery of assigned skills and assignment of more advanced skills. We meet with parents and teachers, if requested, throughout the program to share progress. Students typically attend 2-4 hours a week selecting instruction times from 3:30-8:30 p.m. Monday-Friday or Saturday/Sundays 3:30-6:30 p.m. Our center at 229 Furys Ferry Road, Unit 119 provides a positive, professional, motivational environment where each student has our individual attention. We have provided SES services for the past four years with outstanding parent and student reviews.

 Min. Number of Students (each district): 1
 Cost to District (per hour): \$50

Program Summary:

Sylvan Learning Center provides supplemental education in the areas of reading, writing, and mathematics. Sylvan administers pre-assessments to determine each students' skill gaps and individual academic needs, creates personalized prescriptions, and provides individualized instructional sessions. Students will learn from state certified and highly trained Sylvan instructors, who motivate students through praise and a token reward system; instruction includes the use of manipulative computers, texts, and other learning tools. Sylvan instruction is based on the mastery learning process; each missing skill, identified in the pre-assessment, is learned, practiced, and applied until mastered by the student. A minimum of (2) one-hour instructional sessions per week, or eight sessions per month, is required for adequate exposure to and retention of educational material. On average, each student will progress one academic grade level in thirty-six instructional hours, as evidenced on standardized assessment results.

Program Summary:

The Savannah Sylvan Learning Center offers an approach to learning which enables the student to do better in the classroom; and develop confidence and a love of learning that lasts a lifetime. For over 25 years, Sylvan Centers have used the Sylvan Advantage to identify a student's specific needs with a Sylvan Skills Assessment. A personalized program is created from this assessment and certified teachers use direct instruction and mastery learning to ensure true understanding. No more than four students per teacher meet for one or two hour sessions, after school or on Saturdays, in an attractively decorated instructional area for the total number of hours dictated by the school district's contract with Sylvan. Students work directly with a teacher for instruction; and also for guided and independent practice. Computer software and hundreds of school materials are available for practice until a student reaches mastery. Parents receive progress reports during scheduled conferences.

Program Summary:

The Sylvan NCLB program is the same program advertised on television. Sylvan Learning Centers are conveniently located in Clayton County, Fayetteville, Stockbridge, Oakwood, Peachtree City and Cumming. For more information and directions visit www.educate.com or call 770-684-0861.

Sylvan has been a SES provider in Georgia since 2003 and has helped over 1000 NCLB students. NCLB students participate in the same instruction sessions as all other Sylvan students. No Child Left Behind students have averaged ¼ of a grade level increase on the California Achievement Test over their three months in the Sylvan Reading or Math programs. Our goal is to develop students' academic skills so they can become confident, independent learners.

Instruction is done at local Sylvan Centers so that all of the Sylvan learning materials, textbooks, and computer programs are available. The student teacher ratio is typically three students to one teacher. Students attend Sylvan two times each week for 1 or 2 hours depending on their age. The centers are open for instruction Monday through Thursday from 3:30 to 7:30 PM and on Saturdays from 9:30 AM to 12:30 PM.

The first step is an individually administered diagnostic assessment to pinpoint skill gaps. These skill gaps form the educational prescription individually tailored to meet your child's needs. Each student has a unique lesson plan that is updated after each hour of instruction. The Sylvan educational prescription is linked to the Georgia Performance Standards so instruction impacts students' performance in Georgia classrooms. Sylvan teaches to mastery - we do not go on to a new skill until the student has mastered the previous skill. We provide written monthly reports to parents and classroom teachers on student progress in mastering specific skills.

Min. Number of Students (each district): 1

Cost to District (per hour): \$40

Program Summary:

FitWit is a private company owned and operated by two Atlanta Public Schools educators. Each student working with FitWit completes a personal learning inventory to guide tutors, students and parents in setting appropriate and attainable academic goals. For each new skill, students take a pre-test, curriculum-based measurement assessments throughout the instruction process and a post-test to determine mastery. In addition, Mindspring, a directed worksheet program tracks student progress targeted toward each student's individual needs. Due to FitWit's individualized programs, students are able to make progress toward specific goals versus a generalized basic skills program. During a standard tutoring session, students are met with engaging instruction to introduce new material followed by guided practice on the directed worksheet program. Students also have the opportunity to use Plato software to build skills. Tutoring sessions, lasting 90 minutes takes place in a student's school and/or a community center, and the entire program includes 45 hours of instruction.

Program Summary:

The Kennedy Learning Group is a comprehensive K-12 student tutorial service that utilizes research-based instructional strategies and curriculum, to ensure academic success, by providing tailored, one-on-one instruction to students, in the comfort of their home or through locations of their parent's choice. Our local, highly qualified tutors, combined, have over 30 years of teaching experience. Our instructors have current Georgia teaching certifications or four-year degrees in a specific content area. Instructors are competently trained and highly qualified as defined by NCLB, to serve the academic needs of a wide variety of student demographics. We specialize in educating students with disabilities (SWD). Likewise, The Kennedy Learning Group instructors have experts in the content areas of Reading, Language Arts and Mathematics. The Kennedy Learning Group believes that students must be active learners, with the ability to synthesize and classify data, communicate findings, and evaluate ideas and conclusions. To support this instructional approach, students will engage in performance tasks to demonstrate mastery. This includes instructional delivery using experimenting, modeling, simulations, individualized tutoring, and computer-assisted instruction. Moreover, The Kennedy Learning Group employs the use of the following instructional material: Triumph Learning: Coach, Buckle Down, Wilsons Reading System, all have proven success in raising student achievement scores. After an initial consultation and pre diagnostic, The Kennedy Learning Group will develop an academic plan, in collaboration with both the student, and parent/guardian. Services are available after school and weekends. The cost is \$60 per hour. The Kennedy Learning Group Instructors map instructions to learning needs and improve student achievement. This is The Kennedy Learning Group's first year as a Georgia SES Provider.

Program Summary:

Our company has a combined effort of fifteen years of tutoring students in the Dade and Broward county area. We have one year as an approved SES provider in Florida having served students in three school districts. Pinellas, Dade and Broward. Our programs community partnerships have been a major component for parents that have transportation issues. We offer home individualized sessions that helps student achievement with smaller immediate, intensive instruction. The effectiveness of our program has been demonstrated with the instructional growth of our students in Reading and Math with a passing rate of 98%. Our success have been with ability to service students in grades kindergarten through eight that are bilingual, Exceptional Students and New English Learners to make achievement gaps of one grade level or higher on the Florida Comprehensive Assessment Test (FCAT) and the Standardized Assessment test with a stanine at or above five. Our one to eight student to teacher ratio has been essential in our student progress. Our direct instruction and think aloud strategies allows for students to become independent and confident learners. Our programs two to three times a week frequency of sessions allows for students to process and progress specific skills. Our reading and math assessment tools help to diagnose and monitor students' gaps in areas not mastered or taught. Once a students ISP goals are established our tutor teaches specific skills, provides ample opportunity for practice and then formally or informally assesses skill proficiency. Our state of the art web-based program helps parents and students log on and view skill mastery and attendance reports. Our company has no prior record as a Georgia SES provider.

Program Summary:

Total Learning Concepts is a privately owned educational support service for students of all ages, in all academic areas, and for all levels of abilities. Total Learning Concepts has been teaching students since 1986 in reading, writing, math, science, foreign languages, study skills, SAT/ACT preparation, State of Georgia standardized test preparation, and in school course work. Initially, we assess students' academic abilities by reviewing all school and other test records and or administer nationally normed, performance based assessments. We then prescribe an individualized program of student for each student. The program created includes the student and session objectives, academic and/or GPS areas to be taught, methods and materials to utilize, number of sessions each week, predicted length of program, and selection of the most effective instructor for the student. All sessions meet for a minimum of one hour, and the number of sessions each student attends is determined by the result of test scores and the time frame in which the work must be accomplished. All sessions are documented by the instructor to include the goal, materials and methods utilized, percentage of correct responses, and areas in need of continued instruction. the effectiveness of our program with students on statewide tests, such as the CRCT and GHSGT, can be evidenced by the 23 years Total Learning Concepts has been in operation and the thousands of successful students who have improved in abilities, graduated from high school, passed the State assessments and the number of referrals we receive each month due to our excellent reputation for enabling students to reach their academic goals and potential. Our methods of instruction are face-to-face with degreed instructors who are assigned to a student whose area of need matches the instructor's area of educational expertise and experience utilizing texts, special teaching methods, and manipulatives.

Program Summary:

Tutorial Services is a company that offers a web-based solution, the program we use is called CompassLearning. This is our fifth year of service in the U.S. and our third year as an approved provider in Georgia. We will provide you with everything necessary to access our program. Our program, in Reading, Mathematics, and Science, operates 24/7 and your student can access their work at anytime. Our qualified tutors will monitor your student's work and report to you every two (2) weeks on their progress. In order to properly assess your student they will need to take the CompassLearning pretest and posttest. We align each child's activities to these tests. CompassLearning even has a CRCT tool where we can input your child's CRCT score and a corrective learning path will develop for your child. We feel that each child has a different way of learning and some need more help than others, therefore, we offer the program free of charge all the way through August of the following year. As the 21st century moves forward, computers play a huge role in your child's education. We provide your child the tools necessary to be successful in tomorrow's world. Our slogan, "Making a Difference, One Student at a Time", is our promise to your child and you.

Cost to District (per hour): \$50.00

Program Summary:

Vision Tutoring, LLC excels in improving students' standardized test scores, grades, self-confidence, and perception of learning. All of our trained Tutors are certified teachers or degreed professionals with teaching and/or tutoring experience. Their passion for teaching encourages them to invent creative and engaging lessons that help your child better understand material and gain the ability to apply it to the real world. Your child will receive the one-on-one attention that he or she deserves with 1.5 hour sessions two days per week for at least 2.5 months. Vision Tutoring strives to ensure the comfort and convenience of the parent and student. Therefore, parents may: 1) decide whether to have the tutor provide in-home services or meet at a public facility and 2) set a schedule that is convenient for them. Our Tutors are available every day of the week including weekends.

After performing a diagnostic test, Tutors create a plan to cater to your child's personal learning needs. Verbal, written, and hands-on activities will be utilized to ensure that your child meets his or her academic goals. Parents may select instruction in Reading, English/Language Arts, and/or Math for grades 1-12. Science and Social Studies are also options for grades 9-12. All books and materials are provided free of charge and are aligned to the Georgia Performance Standard to guarantee that your child will be taught the objectives that he or she must learn to be prepared for the CRCT, EOCT (End-of-Course Test) and GHSGT (Georgia High Graduation Tests). Lessons and practice tests mirror each standardized exam, so your child will be practicing for the state test while learning age and grade appropriate topics.

Start your child off on the road to success...contact Vision Tutoring - where we are shaping the world one child at a time.

Program Summary:

Our agency has been a successful tutoring entity for the past 15 years. Our success has been featured in the local and print media as well, including the Oprah Winfrey Show. Last year our Agency was the primary SES provider for Early County school district. Collaboratively, our partnership resulted in the district being removed from a probationary status under NCLB. We have successfully delivered SES Since 2004. We administer pre- and post-tests using MySkillsTutor -an online educational tool aligned to Georgia Performance Standards (GPS). The results help chart the students' academic goals, program structure and timeline of progress. The sessions, offered after school hours, are 1.5 hours per day two to three days per week. Our lab has 20+ internet ready computers. We utilize the GPS as a guide in administering the curriculum to ensure our instructions is consistent with lessons students are being taught in classroom. We provide SES to a minimum of 10 students per LEA.

Program Summary:

Zena's House Inc. (ZH) is a non profit youth development organization that provides tutoring, life skills/health education workshops and educational/cultural trips to middle and high school students in metro Atlanta. ZH has over three years of experience in tutoring math, language arts, reading and developing student's study/test-taking and organizational skills. Zena's House has a low teacher/student ratio of 1:1 and up to 1:4. We have tutoring sessions two times a week, 1.5 hours per session or Saturday/Sunday sessions for 2-3 hours. Lunch is provided for three hour sessions. Sessions are provided in the student's home or at their local library. Each student is administered a pre and post assessment to identify strengths and challenges and used to measure success. Our effectiveness is based on meeting the goals set with the student and parents, increased grades and CRCT scores. Our instructional materials include Georgia Performance Standards (GPS) CRCT workbooks and grade appropriate practice material.
